- ✓ Often referred to as Lou Gehrig's disease, ALS is a progressive, fatal neuromuscular disease that slowly robs the body of its ability to walk, speak, swallow and breathe.
- ✓ The life expectancy of a person with ALS averages two to five years from the time of diagnosis.
- ✓ Every 90 minutes a person is diagnosed with ALS, and every 90 minutes another person dies of ALS.
- ✓ ALS can strike anyone at anytime. The disease knows no racial, ethnic or socioeconomic boundaries.
